the metric said
reality was
the test that found it
budget satisfied
7.3% of real runs broke it
test on the real system
forecast accurate
rollout invents an event
re-anchor to observation
explanations faithful
carry no real information
permutation control
state estimate better
decisions no better
score on the decision
matches the reference
reference misses reality
score the reference too
improved 8 of 8 cases
a third the size at 607
test at a larger n
