(a) coverage: the default fails once $\rho > 1$
violation rate (%)
0
20
40
60
80
no margin
model error (default)
deviations + bias
controlled quantity (ours)
$\delta = 0.1$
10^{-1}
10^{0}
10^{1}
$\rho = \sigma/\varepsilon$
(b) why: the default's margin vanishes
margin produced
10^{0}
10^{-1}
10^{-2}
model error (default)
deviations + bias
controlled quantity (ours)
10^{0}
10^{1}
10^{2}
$\rho = \sigma/\varepsilon$ (measured per run)
